

E-DINAR COIN 2017

OVERVIEW

E-Dinar Coin was founded in August 2016 and managed to become one of the world's most rapidly growing DPOS cryptocurrencies with the pool of over 600,000 users and open representative offices on two continents.

Our main aim is to provide the world with a more just, easy-to-use, and greener financial tool than common cryptocurrencies based on the POW algorithm and a more democratic, stable, and safer instrument than fiat money.

✓ Active Users and Monthly Transactions

As of November 2016, just four months after the launch of the E-Dinar Coin blockchain, the number of active participants reached 600,000 whilst the amount of monthly transactions capped at 500,000.

COIN DISTRIBUTION

Coin distribution would total 2,500,000,000 EDR

Since cryptocurrencies are not based on anything but the number of registered users and the total coin mass owned by the users as well as its acceptance on the financial markets, it was decided that the initial emission of coins would total in 2,5 billion EDR and the daily fixed staking rate would be 0.65% or 19.5% up to 20.15% per month. The maximum number of coins that may be issued within 33 years is 9 trillion EDR.

The stake rate is of a genesis nature and therefore cannot be changed through approval voting by the stakeholders, making E-Dinar Coin much more democratic, inclusive, and profitable than other cryptocurrencies.

CONDITIONS OF MINING

HIGH ROI

Daily ROI amounts to 0.65% per day, upon the total account balance

Mandatory conditions for daily mining:

- At least one transaction in the amount of at least 1 EDC a day
- The percentage of the coins produced is directly proportional to the time of finding funds on the balance sheet
- Maximum Mining is only possible with the “mature” coins

*“Mature” is the amount of EDC which was 24 hours or more on the account balance. In this case, from the specified amount mining will be 0,65% per day.

MARKETING PLAN

You can find Marketing Plan and more information about the unique, referral program, designed specifically for E-Dinar Coin in the Marketing Plan section on edinarcoin.com

MULTI LEVEL REFERRAL SYSTEM

Referral
– the percentage of mining from your partners.
Calculated once daily

CONDITIONS OF RANK OPENING:

Rank A	at least 5 referrals in the first line with the purse balance of not less than 50 EDC
Rank B	at least 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 30 people (up to the seventh line, incl.) with the balance of the wallet of each of at least 50 EDC
Rank C	at least 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 125 people (up to the seventh line, incl.) with the balance of the wallet of each of at least 50 EDC
Rank D	a minimum of 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 625 people (up to the seventh line, incl.) with the balance of the wallet of each of at least 50 EDC
Rank E	at least 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 3125 people (up to the seventh line, incl.) with the balance of the wallet of each of at least 50 EDC
Rank F	at least 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 15625 people (up to the seventh line, incl.) with the balance of the wallet of each of at least 50 EDC
Rank G	least 5 people in the first line, and at least 25 people in the second line, and the total for the entire structure – 78125 people (up to the seventh line, incl.) with the balance of the purse of each of at least 50 EDC

CONDITIONS OF RECEIVING AND AMOUNT OF REFERRAL ACCRUALS:

Rank	Percentage of referral accruals, according to the rank	Required amount on the balance
A	5 %	100 EDC
B	4 %	250 EDC
C	3 %	500 EDC
D	2 %	1000 EDC
E	1 %	1500 EDC
F	0.5 %	2000 EDC
G	0.5 %	2500 EDC

OFFICIAL REPRESENTATIVE OFFICES OF E-DINAR COIN

Apart from our headquarters located in London, the United Kingdom, E-Dinar Coin also has representative offices in the United Arab Emirates, Indonesia, India, Vietnam, Ghana, Pakistan, Nigeria.

We think that a cryptocurrency, just like any other financial instrument, should be understandable and user-friendly. This is why we are planning to continue opening representative offices all around the world in order to help our users find the right answers to their questions and let them understand the true potential of E-Dinar Coin.

Massive broadening of E-Dinar Coin representative office chain in Asia and Europe is set to be carried out in 2017.

DELEGATED PROOF OF STAKE

DPOS algorithm that E-Dinar Coin uses offers a crucially important element—called delegates—that prevents the system from becoming centralized and corrupt on account of misbehaving network nodes that, deliberately or not, make the system insecure.

Delegates are common people who may be chosen via a democratic vote by the stakeholders for purposes of securing the network through validating the blocks, making sure that the information in them is correct, and signing them.

These delegates, which are also called witnesses, are elect via the general vote for purposes of network integrity supervision, minimizing the risks of centralization through taking on the role of block signing in an unbiased way. In such manner, stakeholders still can stake and receive ROI but choose the most responsible delegates, who will ensure that the system integrity stays intact and receive a compensation in form of coins, instead of concentrating wealth in their hands and presenting security threats to the whole blockchain.

Apart from all other things associated with the block validity, delegates must also ensure that the previous block was signed by a trusted node. This way a lack of necessity to wait for the distributed consensus from all members of the network allows for cutting the transaction and block signing times to the minimum, precisely 5 seconds in E-Dinar Coin.

Since delegates are paid for their job and do not have the incentive to manipulate fees because they can be downvoted, and as opposed to physical mining in POW systems where the most powerful miners can set higher transaction fees at their sole discretion, commissions on all internal transactions in E-Dinar Coin are fixed at a low rate of 0,001 EDR.

DECENTRALIZATION

Just like any other cryptocurrency, E-Dinar Coin uses a public decentralized ledger commonly known as a blockchain for storing data records as blocks in a permanent and successive way. The correct order of blocks is ensured because each block in a blockchain is timestamped and includes a link to the previous block.

The blocks cannot be tampered or altered as well as present high byzantine fault tolerance thanks to encryption of all data and its uniform distribution across the network's nodes. It is therefore must be considered an autonomous financial system free of tampering because of a lack of centralized elements where such data are stored.

Full nodes in E-Dinar Coin cryptocurrency - which can be run by any user of the system - store a copy of the blockchain, but there is no official full copy of the blockchain stored in a centralized way. This makes the data in the blockchain incorruptible and easily traceable for enhanced transparency.

TRANSACTION FEE (EDC)

TRANSACTION TIME

E-DINAR COIN INVESTMENT INSURANCE

Insurance of deposits in E-Dinar Coin (starting from over US\$ 10,000) is provided by the company "ASSUR", which has a perpetual license for insurance against financial risks

Date of first E-Dinar Coin deposit insurance: October 18, 2016

CONDITIONS

The contract is being automatically extended and the payment policy is available due to receiving E-Dinar Coin mining bonus.

RATE	MONTH
7.1%	1
13.2%	2
18% upon a condition of the payment for the entire period	3

TYPES OF INSURANCE

- Against the risk of cryptocurrency exchange rate fluctuations
- Against the risk of loss of accumulated savings
- Against the risks of cryptocurrency exchange capability and currency purchasing parity
- Against cyber attacks on e-wallets
- Against loss of brainkey

Guaranteed payments within up to 5 days on the exchanger when applying for withdrawal of funds

E-DINAR COIN LEGAL ISSUES

October 13, 2016, the Administrative Court of Appeal of Ukraine has adopted a decision on the legalization of the decentralized cryptocurrency E-Dinar Coin and approval of its legitimate and legal status. The “EDINARCOIN” LLC has managed to prove that cryptocurrency E-Dinar Coin is an official means of payment, which is not subjected to fees and taxes provided by the state and other regulators, that makes it possible to carry out transactions in the decentralized system and to trade EDR on the world’s exchange markets.

The court’s decision on the legalization of E-Dinar Coin is available at
